

GAMSKETTE TRACKS

RELIABLE AND VERSATILE

GAMSKETTE TRACKS

RELIABLE AND VERSATILE

The Gamskette was developed to create a reliable connection between the snow groomer and the snow while remaining versatile and maneuverable. It is ideal for slope preparation in all snow conditions.

TRACTION AND MANEUVERABILITY

The Gamskette's closed aluminum profile achieves an optimal balance of weight and stability, effectively preventing ice buildup. This design improves climbing ability and traction, allowing operators to confidently navigate steep slopes and challenging descents in light powder or heavy spring snow. The ice spikes on the crosslinks improve grip, ensuring excellent control while grooming the slopes.

MAXIMIZE YOUR TIME ON THE SNOW

Maintenance is crucial for every grooming operation and with the Gamskette, it's also straightforward. The clamping lock and the crosslinks with pre-installed studs make belt replacement easy, minimizing downtime and maximizing your time on the snow.

COMPATIBLE VEHICLES

LEITWOLF

(GENERATION LT, LIT, LI & LE*)

*as of 2011

TECHNICAL DATA

Vehicle width 4.3	4.300 mm 14'1"
Vehicle width 4.5	4.500 mm 14'9"
Weight of one track 4.3	1.090 kg 2,403lb
Weight of one track 4.5	1.150 kg 2,535lb
Width of one track 4.3	1.720 mm 5'8"
Width of one track 4.5	1.820 mm 6'
Distance between tracks	860 mm 2'10"
Height of tracks	150 mm 6"
Pitch	131 mm 5"
Number of crosslinks	72
